

Contents

B. J. Birch, Jean-Louis Colliot-Thélène, G. K. Sankaran, Miles Reid and Alexei Skorobogatov, In lieu of Birthday Greetings	1
Peter Swinnerton-Dyer's mathematical papers to date	23
Carmen Laura Basile and Alexei Skorobogatov, On the Hasse principle for bielliptic surfaces	31
Enrico Bombieri and Paula B. Cohen, Effective Diophantine approximation on \mathbb{G}^m	41
Andrew Bremner, A Diophantine system	63
J.-L. Colliot-Thélène, D. Harari et A. N. Skorobogatov, Valeurs d'un polynôme à une variable représentées par une norme	69
Neil Dummigan, William Stein and Mark Watkins, Constructing elements in Shafarevich–Tate groups of modular motives	91
Tom Fisher, A counterexample to a conjecture of Selmer	119
D.R. Heath-Brown, Linear relations amongst sums of two squares	133
Andrey Levin, Kronecker double series and the dilogarithm	177
William G. McCallum and Pavlos Tzermias, On Shafarevich–Tate groups and the arithmetic of Fermat curves	203
Miles Reid and Kaori Suzuki, Cascades of projections from log del Pezzo surfaces	227
Per Salberger, On obstructions to the Hasse principle	251
G.K. Sankaran, Abelian surfaces with odd bilinear structure	279
